DETAILED ACTION

1. This communication is in response to Applicant's amendment filed on 02/06/2009.
2. Claims 1-35 are currently pending and have been examined.

Claim Objections

3. Claims 10, 20, 21, 24, 25, and 26 are objected to for usage of the functional language "configured to". It is believed that Applicants intend "configured to" to mean "programmed to" since "configured to" is functional language and therefore given less patentable weight. In light of the notice function of the claims, the Examiner respectfully requests changing "configured to" to "programmed to" where a positive recitation is desired. See Also MPEP 2106.

Claim Rejections - 35 USC § 101

4. Claims 1, 10, 14, and 17 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter. Based on Supreme Court precedent¹ and recent Federal Circuit decisions, a §101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying

¹ See also *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

subject matter (such as an article or materials) to a different state or thing. See *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps.

To meet prong (1), the method step should positively recite the other statutory class (the thing or product) to which it is tied. This may be accomplished by having the claim positively recite the machine that accomplishes the method steps. Alternatively or to meet prong (2), the method step should positively recite identifying the material that is being changed to a different state or positively recite the subject matter that is being transformed. Applicant is advised to add a machine or computer into the body of the claims.

In this particular case, the claims fail prong (1) because the method steps are not tied to a machine and can be performed without the use of a particular machine. As noted below, a 'process' is not a machine. Additionally, the claims fail prong (2) because the method steps do not transform the underlying subject matter to a different state or thing.

Allowable Subject Matter

5. Claims 20-35 are allowed if Applicant overcomes the claimed objection described above.
